SUMMARY

Enthusiastic Full Stack Engineer with a proven track record in product management . **Full Stack Developer & Product Builder** with a strong grip on backend systems, frontend interfaces, and automated QA pipelines. I design scalable architectures, build secure APIs, and deliver features from idea to deployment. Comfortable leading teams, fixing bugs, or launching entire platforms — whatever gets the job done.

EXPERIENCE

Full Stack Developer and QA

Zikra Infotech LLC   02/2023 - Present   Dallas, United States

- Developed and maintained full-stack features for **Z360.biz**, a multi-tenant SaaS platform.
- Designed and managed backend APIs, forms, and communication modules with secure validation and role-based access control.
- Integrated CI/CD workflows to deploy across **staging**, **development**, and **production** environments.
- Designed RESTful APIs, built secure form logic, and implemented dynamic features (Knowledgebase, Contacts, Messaging,Forms) across the **Z360.biz** platform.

Software Developer

BirdCoders   04/2025 - Present

- Contributed to the development of a custom **Point of Sale (POS)** system using **Core PHP**, **CodeIgniter**, and **Laravel**, tailored for client-specific workflows and offline-first environments.
- Built and optimized database schemas and API endpoints to support real-time inventory, billing, and sales reporting modules.
- Participated in sprint planning and milestone delivery while balancing hybrid availability and async contributions.

EDUCATION

Advanced Diploma in Software Engineering

Aptech Garden Center

07/2022 - Present   Karachi, Pakistan

Intermediate in Computer Science

Fatmiyah Boys College

07/2022 - 08/2024   Karachi, Pakistan

STRENGTHS

💎 **Collaboration**

Experience working in agile teams with designers, frontend, and backend developers, ensuring smooth development and deployment processes.

💎 **Full-Stack Project Ownership**

Ability to handle full-stack responsibilities, from designing UI components to setting up server architecture and database integration.

💎 **Code Optimization**

Focus on writing clean, maintainable, and scalable code.

SKILLS

Javascript   NodeJs   ExpressJs

React Js   Core Php   Laravel   Dart

Flutter   JIRA   C#   .Net   Selenium

Laravel Dusk   Git/Github   Docker

InertiaJs   SQL/MySQL   Apache

Front-end Performance Optimization

Web Design   Microservices Architecture

API Design and Documentation

OAuth/JWT   RESTful API Development

Postman   Object-Oriented Programming
